Collected Knowledge & Wisdom on

LocationIQ

Provides:

This API provides geographical data for a given address and can find an address given longitude and latitude. It also provides both static and dynamic maps based on location. It also provides directions and points of interest at an address.

Key Provisioning:

Pain factor (*0=ezpz...5=nightmare*): **_1_**

- Sign up requires only name and email
- To login you are required to put your API key(it will be in the confirmation email after you sign up and on your dashboard) and email.

Quotas:

- 10000 requests/day

The Good:

- Very descriptive documentation with list of errors and examples
- Easy to use
- The json output does have too much data

The Bad:

- Some features are still in beta
- The documentation is not linked on their main page

The Ugly:

- ...
