Collected Knowledge & Wisdom on

ipstack

Provides:

This API provides location information such as latitude and longitude based on an input IP. This can also be used to access the user's country, city, and zip code, among other details.

Key Provisioning: **Pain factor** (*0=ezpz...5=nightmare*): **_0_**

- You are required to sign up for their site to request a key.
- Free version gives user access to Location Module
- Visit primary documentation for more details (https://ipstack.com/documentation)

Quotas:

- 10,000 a month

The Good:

- Free and very simple to use
- Full documentation full of code examples
- Returns a plethora of data about the user

The Bad:

- Does not provide a function to retrieve IP, only fetches data given some IP.

The Ugly:

- Its spooky
